Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 28, 2007 has been entered.

Claim 55 is objected to because of the following informalities: the term "solasine" is misspelled i.e. it should be "solasonine". Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 53, 55 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cham et al (AU-B-57853/80).

Cham et al disclose a method for treatment of psoriasis comprising administering to a patient a pharmaceutical formulation containing at least one active ingredient selected from the group consisting of solamargine, solasonine and mono- and di-saccharides of solasodine (page 17). A person having ordinary skill in the art at the time the claimed invention was made would have been motivated to combine solamargine and solasonine in various proportions and to use the resulting composition for the treatment of psoriasis on the basis of the teaching by Cham et al that each of the said compounds alone or in combination is useful for treating psoriasis.

Applicant's arguments filed February 28, 2007 have been fully considered but they are not persuasive.

Applicant contends that Cham et al disclose a composition that comprises 33% solasonine, 33% solamargine and a third component made up of di- and mono-glycosides and free sugar and that one of skill in the art would not be motivated to remove said third component because doing so would go against express teachings of the reference. This argument has not been found persuasive because the teaching by Cham et al on page 17 does not require the presence of di- and mono-glycosides and free sugar. Further, the terminology "consisting essentially of" (claim 53) limits the scope of a claim to the specified materials and those that do not materially affect the basic and novel characteristic(s) of the claimed invention.
